

# **INSECTS AND PLANTS**

## **Fall 2017**

**Credits:** 1

**Course number:** IDH2930 (1G49)

**Schedule:** Thursday period 8 (3-3:50 pm)

**Location:** McGuire Center for Lepidoptera and Biodiversity Conference room 217, Florida Museum of Natural History, 3215 Hull Rd., Powell Hall

### **Instructors**

Dr. Andrei Sourakov

McGuire Center for Lepidoptera, Room 212 (second floor)

Florida Museum of Natural History

Powell Hall on Hull Road

UF Cultural Plaza

PO Box 112710

TEL: (352) 273-2013

Email: [asourakov@flmnh.ufl.edu](mailto:asourakov@flmnh.ufl.edu)

Dr. Keith Willmott

McGuire Center for Lepidoptera, Room 220 (second floor)

Florida Museum of Natural History

Powell Hall on Hull Road

UF Cultural Plaza

PO Box 112710

TEL: (352) 273-2012

Email: [kwillmott@flmnh.ufl.edu](mailto:kwillmott@flmnh.ufl.edu)

Dr. Thomas Emmel

McGuire Center for Lepidoptera

Florida Museum of Natural History

Powell Hall on Hull Road

UF Cultural Plaza

PO Box 112710

TEL: (352) 392-5894

Email: [tcemmel@flmnh.ufl.edu](mailto:tcemmel@flmnh.ufl.edu)

### **Office hours**

By appointment or drop by office of Dr. Sourakov

### **Course description**

Insects and plants are intimately connected and have been so for 300 million years. During this time, the evolutionary arms-race between the two groups has produced examples of co-existence more fantastic than any science-fiction. During this course we will use the textbook to stimulate more in-depth discussions of diverse topics linked to insect-plant interactions, including co-evolution, chemical ecology, predator-prey relationships, mimicry, natural selection, camouflage, host-mediated speciation and adaptive radiation. In addition to lectures and discussion sessions, students will have a chance to visit the collections of the Florida Museum of Natural History and of the Division of Plant Industry, in addition to the Natural Area Teaching Laboratory located behind the Florida Museum of Natural History, and the Chemical Ecology Laboratory of USDA. Students will gain an appreciation and

understanding of the evolution of two of the most important groups of organisms on the planet, in addition to developing their ability to think critically about scientific research. This course is intended to stimulate interest in the natural world, in which insects and plants form the great majority of species, and there are no prerequisites beyond a fascination in the diversity of life.

## **Objectives and basis for grading**

### *Lectures*

Short lectures during each class will provide an introduction and describe classical and contemporary research relevant to each week's topic. Students will be introduced to a broad variety of research methods and will learn common empirical patterns, processes and theories proposed to explain them. Additional articles from the primary scientific literature may be suggested or required as background reading in preparation for each lecture.

### *Class discussion*

During each class we will have time for discussions of the course textbook. All students are expected to contribute in class and the overall grade will reflect this contribution. Students are not expected to fully understand any set literature, but are expected to come to class with at least two questions prepared about aspects of the literature reviewed, including concepts which they do not understand or would like to discuss further.

## **Grading**

### **% by activity**

<b>Activity</b>	<b>% of final grade</b>
Attendance	50
Class discussions	50

A = 95-100%

A- = 90-94%

B = 85-89%

B- = 80-84%

C = 75-79%

C- = 70-74%

D = 65-69%

D- = 60-64%

E = <60%

## **Current UF grading policies**

See: <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

## **Class attendance, work and exam policies**

Students are expected to attend all classes unless there are valid reasons for absence, and part of the grade will reflect class attendance. Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at:

<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>

## **Textbook (will be provided to students on loan hence not required).**

Edward S. Ross (2014). *Insects and Plants. A Living Theater*. Mariposa Press. 214pp.

## **CLASS ACTIVITIES, READING ASSIGNMENTS AND GRADING**

### **READING ASSIGNMENTS**

#### **WEEK 2**

August 31

CLASS DISCUSSION: *Insects and Plants*: pp. xix-xxv, 1-18

#### **WEEK 3**

September 7

CLASS DISCUSSION: *Insects and Plants*: pp. 19-37

#### **WEEK 4**

September 14

CLASS DISCUSSION: *Insects and Plants*: pp. 38-54

#### **WEEK 5**

September 21

CLASS DISCUSSION: *Insects and Plants*: pp. 55-69

#### **WEEK 6**

September 28

CLASS DISCUSSION: *Insects and Plants*: pp. 70-85

#### **WEEK 7**

October 5

CLASS DISCUSSION: *Insects and Plants*: pp. 86-105

#### **WEEK 8**

October 12

CLASS DISCUSSION: *Insects and Plants*: 106-112

#### **WEEK 9**

October 19

CLASS DISCUSSION: *Insects and Plants*: pp. 113-126

#### **WEEK 10**

October 26

CLASS DISCUSSION: *Insects and Plants*: pp. 127-141

#### **WEEK 11**

November 2

CLASS DISCUSSION: *Insects and Plants*: pp. 142-155

#### **WEEK 12**

November 9

CLASS DISCUSSION: *Insects and Plants*: pp. 156-169

#### **WEEK 13**

November 16

CLASS DISCUSSION: *Insects and Plants*: pp. 170-185

#### **WEEK 14 - Thanksgiving**

**Week 15 -November 30 – Last Class**
