

Course Syllabus

Uncommon Reads -- Great Proofs (IDH 2930)

Section 0194, 5-digit code 26304

Fall 2020

Instructor Name: Miklos Bona

bona@ufl.edu

This course is a synchronous class, with live meetings by zoom at 3 pm on Monday. It carries one credit and entails one contact hour per week. Prerequisites: MAC 2312.

For basic course information, see [the Course Policies page, Area 1](#).

The Course learning goals are listed at the bottom of our [front page](#).

[Edit](#)

Our class sessions may be audio-visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate verbally are agreeing to have their voices recorded.

If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live. The chat will not be recorded or shared.

As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

Please see the [Course Policies page](#) for detailed information on grading.

The textbook is Proofs from the BOOK, 6th edition, by Aigner and Ziegler. You can buy the book on amazon [using this link](#).

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the [Disability Resource Center \(Links to an external site.\)](#). It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

See Area 4 of the [Course policies page](#) for information about student evaluations of this course.

In this class, every student will be assigned some proofs from the textbook, and a date when the student will present those proofs to the class. These assignments will be made during the first class, that is, at 3 pm on Monday, August 31. It is therefore very important that you participate at the zoom meeting of that class.

The syllabus will be updated after the first class, once the order of the presentations is known.
