**COURSE OBJECTIVES AND GOALS:**

Dr. Patricia Wright is one of the world’s leading primatologists, having studied night monkeys in Peru and lemurs in Madagascar. Her unrelenting support of Madagascar and its natural environment led to the creation of Ranomafana National Park and the Centre Val Bio research station. Her story is an inspiring one – she was a practicing social worker in New York when her purchase of a pet monkey changed her life. She started graduate school in her 30s – after she had been to Peru and published on her research with no real affiliation to academia. Through her remarkable career, Dr. Wright overcame many of the same challenges as other non-traditional students, and as a single mother, she successfully combined research in the field with raising an adventuresome daughter. *High Moon Over the Amazon* tells this story of Dr. Wright’s transformation from housewife to world-renowned scientist, and her work on the owl monkeys of Peru. *For the Love of Lemurs* details her work in Madagascar, following her from her co-discovery of the golden bamboo lemur, through the creation of the national park and research station, and then her role in the IMAX film *Island of Lemurs*. Through our readings and discussion, we will explore Dr. Wright’s pathway to scientific preeminence and the evolution of her efforts to integrate conservation and human well-being.

This (Un)Common Read course is perfect for students with an interest in nature, primates, women in science, non-traditional paths to scientific success, exploration, discovery, and field research. Prior to some readings, the instructor will provide short introductions to the localities, wildlife, and people

described in the readings, augmented by photographs (unique species, environment, habitat loss, the local people and cultural activities) from recent trips to Madagascar. One of the unique strengths of the class will be the instructor's first hand experiences and impressions from multiple trips to the country, as well as her personal interactions with Dr. Wright.

While Dr. Wright's books stand on their own as engaging and informational reads, this course also makes an excellent primer for two other classes at UF: ZOO4956: Madagascar – Biodiversity & Conservation in a Developing Country (UF's study abroad course in Madagascar) and BOT4935/ZOO4926: Global Biodiversity and Culture: Integrating Conservation and Human Well-being (part of UF's International Scholars Program).

### **GRADING:**

Students or pairs of students will present and lead discussion on a paper(s) from the course list; these papers are instructor-selected journal articles and other documents related to course content. Each presentation will be worth 100 points. Each student will also complete an individual final project, worth 130 points. This class project can be delivered as an academic poster, a personal reflection, or a creative endeavor related to our readings or a specific area of interest related to class content. All final projects will include a presentation to the class, and must be supported by academic citations (not websites). Meeting the deadlines for confirming your paper and final project choices are worth 5 points each.

**Note that ppts (for paper presentation as well as final project presentation) must be uploaded to Canvas at least 24 hours prior to the presentation. Online submission closes at 1:55 pm the day before presentation. Meeting these deadlines will be worth 5 pts each.**

Class participation is essential for success in (Un)Common Read courses. Students will therefore be evaluated on participation in classroom discussions. Each discussion session will be worth up to 5 points. The following rubric will be used for grading:

0 points = unexcused absence.

1 point = present but does not contribute.

3 points = participates in discussion by adding an opinion, posing thoughtful questions, and answering questions.

5 points = makes exemplary contributions to discussion by integrating concepts, introducing novel perspectives, and drawing out contributions from classmates.

Your final grade will be based on the percentage of the total points earned as follows:
