Course Syllabus

In order to get an A in this class, you will need to make a good presentation, and attend the presentations of others. You cannot miss more than two classes.

The textbook is Calculus Gems, by George F. Simmons, ISBN 978-0-88385-5614.

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the **Disability Resource Center (https://disability.ufl.edu/students/get-started/)** . It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

In this class, every student will be assigned some proofs from the textbook, and a date when the student will present those proofs to the class. These assignments will be made during the first class, that is, at 3 pm on Monday, January 10. It is therefore very important that you participate at that class.

The syllabus will be updated after the first class, once we know who will speak on each day.

Plan of talks:

January 10 Distribution of tasks

January 17 Martin Luther King's Day, No Class

January 24 and subsequent Mondays: To Be Announced after the first class.
